

CARLIN HOOP HOUSES

Carlin Hoop Houses 14', 16', and 20' are a sturdy yet inexpensive, High Tunnel year-round structure. They feature a one or two piece hoop of 1.315" O.D. x 14 gauge Allied Gator Shield galvanized tubing on 4' centers. The houses can be purchased with either 30" or 60" ground stakes or without stakes and can be made portable, using a baseboard to connect the bows. The 1 or 3 runs of purlins are 1.315" O.D. x 14 gauge swaged tube.

Center height with 30" ground stakes:	Width	Center Height	Roof Pole
	14' House	6'6"	24'
	16' House	7'	24'
	20' House	9'6"	32'

Features:

- * Heavy-duty construction
- * Simple design for easy installation
- * Exclusive LockUp® Purlin clamps

Options available include:

Endwall frame package, poly lock, heaters, HAF fans, benching, exhaust fans and thermostats.

W-TRUSS SHADE STRUCTURE

Shade with style! Our W-Truss shade structure has always combined strength with elegance. Now our new peak roof option allows you to add style to your garden center. It mirrors the look and feel of a greenhouse while increasing the expansive feeling of an outdoor retail space. Both roof options are still built on a frame that is one of the strongest retail shade structures in the industry. Why choose? Now you can have form and function in one structure.

Very strong

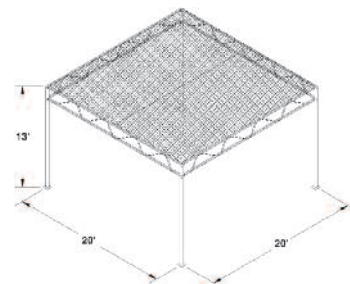

Sturdy, horizontal truss allows for long spans between supports.

Quick install

Easy shade attachment system provides for quick installation and removal.

Shade cloth

A variety of shade cloths are available to provide the best environment

Vertical Posts	3" x 3" Square Tubing
Truss Top/Bottom Chords	2" x 2" Square Tubing
Truss Webbing	Formed Galv. Steel
