FLORAL PLANT GROWERS DENMARK, WI

www.natbeauty.com

Floral Plant Growers continues to be your dedicated plug supplier with over 25 years of experience in young plant production. It is your success that is the motivation for Floral Plant Growers to strive to grow the best young plant products in the market. The "FOCUS" at Floral Plant Growers is to meet your needs with consistent young plant crops delivered each week on time and in full.

Over the years we have listened to what your needs are:

- 1) Quality Product – consistent product delivered week after week.
- 2) Order Fulfillment – deliver what was ordered for the date ordered.
- 3) The ability to fix problems when they arise.

We continue to track our five year performance of delivering quality products at a better-than-97% fulfillment rate. Staying on top of the newest products, we offer the latest and best varieties. Floral Plant Growers stands ready to assist you with your young plant business.

PLANTPEDDLER CRESCO, IA

www.plantpeddler.com

We are your proven supplier of top quality plants that meet all your needs. Located in Cresco, Iowa since 1980, Plantpeddler has built a very colorful history. With roots starting in a traditional floral and garden center format, Plantpeddler has seen extensive growth through the development of multiple divisions that serve an extensive clientele ranging from gardeners to greenhouse growers.

- Bringing world class breeding in horticulture from leading and emerging breeders to greenhouse producers throughout North America.
- Industry leadership in research, technology, production and distribution of Hiemalis Begonias, shipping millions of young plants annually to growers across the USA and Canada.
- Leader in selection, production and distribution of vegetatively produced flowering annuals, with regional, national, and international customer base.
- Developers and specialists in international importation of cuttings for valued added processing at Plantpeddler.

FARIBAULT GROWERS FARIBAULT, MN

www.fgimn.com

Faribault Growers, Inc. has been in business for 17 years. Our growers, however, have over 48 years of grower experience. Located just 45 minutes south of the Twin Cities on I-35, Faribault Grower, Inc. is also home of the legendary Mums From Minnesota.

We grow rooted liners of spring annuals, herbs, succulents, grasses and Minnesota hardy chrysanthemums which are shipped all throughout the United States. The majority of our liners are grown in a 25 cell, single variety strip. By offering liners in smaller quantities, growers will be able to try many different items to outfit their sales area with a unique variety of plants.

GALEMA'S GREENHOUSE WEST LAFAYETTE, IN

www.galemasgreenhouse.com

Galema's is a wholesale grower located in West Lafayette, IN. Founded in 1991 on Grandpa's farm, the physical space has grown to over an acre under cover.

What sets Galema's apart from others?

Galema's Greenhouse only uses trusted breeders for uncompromised plant quality plus will ship low quantities! They offer the newest items plus all the standard favorites at affordable prices. Galema's deliver across Indiana and to some neighboring states, but ship Young Plants anywhere in the US.

- Young Plants are sold in 26 Elle-Pot Strip or 50 Elle Tray.
- Minimum order is 1 Strip – or 25 plants!

MALMBORG'S ROGERS, MN

www.malmbourgs.com

Lloyd and Pearl Malmberg established Malmberg's Garden Center in 1958. George Lucht worked with Lloyd for many years and in 1972 George purchased the business from Lloyd and Pearl. "Malmberg's Garden Center" had earned an excellent reputation in the community and George decided to keep the name "Malmberg's" and add "Geraniums By George" as his own personal touch. George expanded the business when he purchased the Rogers location in 1976 and developed greenhouses and a retail store on the site.

Malmberg's is truly a family owned and operated business. Today George (CEO) and his son Troy (President) own the company. George's daughter Keri handles many varied aspects of the business including inventory, planning and customer service. Van Cooley, George's son-in-law, leads the sales and marketing drive in retail and fundraising. George's grandchildren are learning more about the business as they spend available time working in the greenhouse and retail stores.

They root over nine hundred varieties of plants, producing over four and one half million plants, which are brought in from around the world. They grow finished plants for their own Garden Centers and other retailers in the area. There are always new and interesting varieties at Malmberg's Garden Center so stop in and see what new plants and merchandise are available.

ZYLSTRA GREENHOUSES Z-BEST PREMIUM GARDEN PLANTS KALAMAZOO, MI

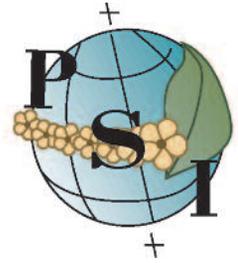

www.Zbestgreenhouses.com

Zylstra Greenhouses, located in Kalamazoo, Michigan, is a wholesale producer of annual plugs and rooted cuttings for independent greenhouse growers, garden centers and landscapers. They have been in business for 20 years, with over 25 acres of production at 4 locations.

Their major product lines are Selecta First Class, Belgian Mums and Simply Beautiful brand.

They pride themselves on being among the leading growers in the nation choosing only high quality genetics, from both cuttings and seed. Whether you are a retailer, grower, or landscaper, they have many products to fit your needs.

PLANT SOURCE INTERNATIONAL ROGERS, MN

www.plantsourceinternational.com

In 1997, with the encouragement and support of several growers, Troy Lucht created Plant Source International and partnered with Floraplant in Mexico to produce and ship spring vegetative material to North American growers.

PSI quickly developed a reputation for honoring commitments, shipping quality cuttings and providing exceptional customer service.

In 2002, PSI partnered with Oglevee to market PSI under the Plant Selection as the "unbranded brand". The two companies began a relationship with Plant Haven for new genetics. After the shipping season, Troy felt it was time to move on from Floraplant. PSI Mexico was created with partner Mauricio Paniagua where they leased an office, some greenhouses and built their own greenhouses on leased land.

During this first year of production at PSI Mexico, the marketing of PSI took a new direction with the addition of a marketing specialist, Alan Zaeske, in 2003. PSI committed to produce Suntory product for Jackson and Perkins for the North American market. Construction of greenhouses was ongoing.

PSI Mexico spread their wings with the purchase of land in Tlatizipan in 2004 and began to construct the first production greenhouse at the newly designated Section T.

In 2005, the order processing was greatly improved with the addition of an administrator, Linda Strandlund, to the North American office staff. We continued construction at Section T and received certification from USDA to ship geraniums to the US.

Perhaps the most appreciated improvement for our customers was the new computer program for sales and on-line availability that was put into place in 2006. Order processing was greatly improved allowing for orders to be processed in a more timely fashion. Construction continued at Section T with another greenhouse and an office and cooler.

PSI is continuing to expand its product line and its facilities to meet the needs and expectations of our customers.

Items listed in our catalog are a sampling of products available from a specific vendor.
